

Supplemental Information for  
**A chamber study of secondary organic aerosol (SOA) formed  
by ozonolysis of *d*-limonene in the presence of NO**

Figure S1. Time series of mass, ozone, nitric oxide and nitrogen oxides concentration for experiment 3/10/2013; limonene, nitric oxide and ozone supply stopped at around 8 h after the introduction of limonene to the chamber. Number concentration are not available to plot.
